**SAVE TIME  
AND MONEY!**

**SOLID STEEL STRENGTH®**

# AMERI-CANA® PANEL

## SUPERIOR STRENGTH AND VERSATILITY

Ideal Roofing's Ameri-Cana® roofing and siding panel offers superior strength with its strong 80,000 psi full-hard steel core and its 5 specially-designed 3/4"-high ribs spaced every 9 inches. Superior strength means savings on wood or steel purlins for the builder. Please consult the following load tables.

## "OUR RIBS ARE BETTER!"

The ribs on the Ameri-Cana® panel are reinforced to better accommodate fasteners. With its symmetrical pattern and ribs with steeper angles, the Ameri-Cana® panel is considered the ultimate roofing or siding panel for agricultural, commercial or industrial buildings as well as for residential roofing applications.

\*APPLICABLE ONLY ON THE AMERI-CANA®

## 4 COATS OF PROTECTION FOR LONGER LIFE

## Up to 40 YEAR LIMITED WARRANTY

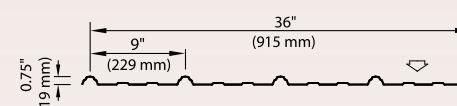

### WEATHERTIGHT OVERLAP

Ideal Roofing's Ameri-Cana® panel offers maximum protection against leakage with its built-in anti-siphon groove to counter water infiltration resulting from capillary action. This feature makes the Ameri-Cana® panel "ideal" for use as a roofing sheet for long and low rafters with a roof pitch as low as 3/12.

### UNIFORMLY DISTRIBUTED LOADS (LBS/FT<sup>2</sup>) FOR TRIPLE SPAN CONDITION

26 gauge (.021")	423	237	135	87	63	48

# CANADIANA SIDING PANEL

### SUPERIOR STRENGTH STEEL SIDING

The Canadiana panel is destined to become the industry's most versatile lightweight steel siding panel with its strong full-hard steel core 80,000 psi and its seven 5/8"-high ribs spaced every 6 inches.

### "... COVERS A WIDER AREA"

Economically formed from a 41-in.-wide steel coil to a final 36-in. ribbed sheet, this panel covers a wider area than other siding panels. Consider the aesthetic and structural qualities of our Canadiana steel siding panel for exterior and interior use on agricultural, commercial and industrial buildings.

In addition, this panel is available with a 42" coverage in 26 gauge (0.021") or 24 gauge (0.026") which will save more on installation time for larger projects.

### UNIFORMLY DISTRIBUTED LOADS (LBS/FT<sup>2</sup>) FOR TRIPLE SPAN CONDITION<sup>1</sup>

(Theoretical Data)
